

NTK OXYGEN SENSORS

IMPROVED AND HARMONIZED

As the leading supplier of original equipment oxygen sensors, NTK continues to set the benchmark by developing sensor technologies that align with today's advanced vehicle components.

In order to remain relevant to new applications and for ease of installation with existing vehicles on the road today, NTK is introducing its 4th generation O2 sensor. Improvements have been made to the design of the cable, connector, and the overall body, but OE fit and function remain the same.

CABLE LENGTH FOR MAXIMIZED COVERAGE

- ▶ minimal length increases to most SKUs
- ▶ cable tie and clip kit included
- ▶ splicing not required
- ▶ required length is adjustable

NEW HARMONIZED PART NUMBERS:

22152, 23191, 23192, 23193,
23194, 23195, 25270
(26 to 7 consolidations)

UNIVERSAL CLOCKING CONNECTOR

- ▶ OE-compatible design
- ▶ OE-quality connector
- ▶ multiple design fitment
- ▶ plug-and-play solution

UPGRADED 4th GENERATION SENSOR

- ▶ thicker body
- ▶ OE fit and function: compatibility tested
- ▶ upgraded heater: faster light-off
- ▶ welded body: improved rust-and-splash protection
